Country of Issue: Cook Islands

The Coin

The second coin in the Architectures of the World series that puts some of the world's most celebrated landmarks at your fingertips, this 2 oz. fine silver coin invites you to the stunning island in the southern Aegean Sea, Santorini. The coin's reverse presents an iconic view of the island - featuring the picturesque whitewashed buildings and blue-domed churches the island is so well known for standing out in highest relief that create a striking contrast against an engraved rocky cliff shoreline in subtle fading relief and deep blue sea. Written against a stone mosaic proof background is the Greek word Θήρα (Thira), the official Greek name of the island of Santorini.
